Раздел 2 (задания по чтению)

Вы проводите информационный поиск в ходе выполнения проектной работы. Определите, в каком из текстов A–F содержатся ответы на интересующие Вас вопросы 1–7. Один из вопросов останется без ответа. Занесите Ваши ответы в таблицу.

12

1. What are the complications of bad sleeping patterns?
2. What steps can prepare our bodies for going to sleep?
3. What is the impact of sleepless nights at exam time?
4. Why is sleep so important for people?
5. What can be dangerous about watching a movie late at night?
6. Which lesson should help children sleep well?
7. In what kind of environment do people usually sleep best?

A. It's common knowledge that people sleep best in a dark room that is slightly cool. It's important to close your blinds or curtains and make sure they're heavy enough to block out the light. You can add extra blankets or wear pyjamas if you're cold. Note that an uncomfortable bed, heat and noise can ruin a good night's sleep. A TV is also a distraction.

B. If you don't sleep enough or have a disturbed sleep you can get heart disease, high blood pressure and even diabetes. People who don't sleep enough get colds and flu more often than those who do. Moreover, recent research proves that poor sleepers gain weight more easily than people who sleep well. Extra kilos are the reaction of the body to the stressful sleepless situation.

C. Think twice before watching a movie late at night. Don't spend sleeping time on endless computer games. The thing is that by getting up and going to bed at the same time every day, even on weekends, you teach your body to follow a healthy regime. You'll quickly fall asleep, will have a good night's sleep and will wake up at the expected time feeling fresh and active.

D. Some easy steps can prepare your body for going to sleep. You probably have some regular bedtime habits, even if you don't realise it. Brushing your teeth, taking a shower, reading a book and setting your alarm clock may all be part of your evening routine. Remember that you should perform these activities in the same manner and in the same order every night.

E. Sleepless nights at exam time are very bad for students. If you prepare for your exam late at night, it will not improve your performance during the exam. On the contrary, it will affect your ability to concentrate, to react quickly and to analyse information. Recent research shows that the results of the tests written after sleepless nights are lower than usual grades.

F. If you think that during sleep, the brain rests, you're mistaken. It's a common myth about sleep. Sleep is definitely needed — but it's not your brain that needs to rest, it's your body that needs to relax. Your brain is still working when you're asleep, controlling physical functions like breathing and your heart beat. However, because the brain does not have to go through the constant stress of thinking, you get up refreshed and recharged.

Запишите в таблицу выбранные цифры под соответствующими буквами.

‘The 1900 House’

‘The 1900 House’ was a reality television programme in Britain. It took people back a hundred years to the time of Queen Victoria, when there were no computers, mobile phones or the Internet. The idea of the show was to give people an experience of living in the past.

A modern family, the Bowler family, spent three months living like people at the beginning of the 20th century. There were the parents (Paul and Joyce) and their four children (three daughters and a son). The cameras recorded them every day. The house didn't have a telephone, a fridge, a TV set or even central heating. The Bowlers wore clothes from 1900 and ate the food that existed in England at that time. There wasn't much to choose from. The main dishes on the table were meat and fish, and the day usually started with a cup of tea and porridge.

The father of the family, Paul Bowler, still went to work but in an old-fashioned uniform. He couldn't read newspapers or use a computer. The mother, Joyce, became a housewife and stayed home. She did all the cleaning, washing and cooking. The children still went to school, but they changed their clothes on the way to and from school so their classmates wouldn't know anything about this unusual project.

The Bowlers noticed that life at the beginning of the century was much slower. It was rather hard for them to get used to the new speed. For example, it took 28 minutes to boil water and make a cup of tea. And can you imagine cleaning the house without a vacuum cleaner or washing clothes without a washing machine? There wasn't any toothpaste or modern shampoo. Without central heating nobody thought about a warm bath or a shower in the morning. Toothbrushes were made of pig and horse hair. Toothpaste was expensive so most people cleaned their teeth using salt or soda. The children thought it was horrible.

11-year-old Hilary said: "The most difficult thing was finding entertainment. We couldn't go to the cinema or to a café. It was a new experience to be with the family for half a day or more. It was new and hard to be nice to each other all the time. But I really think we all became closer."

17-year-old Kathryn remembered that she couldn't wear any make-up. She had to wear a corset every day and had only three sets of clothes: one to wear every day, the second — to wear while cleaning, and the third was for special events, like celebrations.

When the show was over the Bowlers were asked: what did you miss most from the modern world? The father said it was a hot shower. The mother had longed to have a quick cup of tea. The daughters said it was the music, the hot water, shampoo and “normal sounds like the washing machine” which they missed. For the son it was pizza and the computer.

It's interesting that the family was allowed to keep anything they wanted after the project. Joyce took her corset and each of the children took something from the house to remind them of their experience.

You need to read the text aloud. You have 1.5 minutes to read the text silently, and then be ready to read it aloud. Remember that you will not have more than 2 minutes for reading aloud.

How many planets are there in our Solar System? Most people say eight but there are those who would say nine. They believe that there is one more planet in the Solar System – Planet Nine. The planet doesn't have a name because its existence is not proven. The planet is so far away from the Sun, it reflects very little light and cannot be seen with a telescope.

In 2016, space researchers came up with information about the possible location, mass and other characteristics of the planet. Now they are going on with their work and say that the chance of the existence of Planet Nine is about 90 percent. They insist, however, that until the planet is caught on camera, it cannot be counted as being real.

2

Task 2. You are going to take part in a telephone survey. You have to answer six questions. Give full answers to the questions. Remember that you have 40 seconds to answer each question.
